**ABSTRACT.** Two species of aphids — *Thelaxes suberi* (DEL GUERCIO, 1911) and *Theroaphis (T.) hungarica* SZELEGIEWICZ, 1969 — were recorded from Poland.

Reviewing SZELEGIEWICZ's collection of aphids the author found some slides with specimens of two species of aphids new to the Polish fauna. One of these species has been collected also by the author in Łomna-Las near Warsaw.

***Thelaxes suberi* DEL GUERCIO, 1911**

Great Poland: Łęknica, 10 VII 1965, on *Quercus cerris* L., 18 apterous viviparous females, leg. E. KIERYCH (IZ PAN coll. No. 118). Mazovia: clearing of Kampinoski National Park, Łomna-Las, 23 V 1986, on *Quercus robur* L., 6 alate specimens, leg. J. PIECHOTA (IZ PAN coll. No. 143). Species known also from *Quercus conferta* WIT. from Bulgaria, France, Spain, Irak, Israel, Portugal and Turkey.

***Theroaphis (Theroaphis) hungarica* SZELEGIEWICZ, 1969**

Mazovia: Kampinoski National Park, Łomna-Las, 15 June 1976, on *Ononis arvensis* L., 2 alate viviparous females, leg. B. RYCHLIK (IZ PAN coll. No. 119). Up to now species known only from Czechoslovakia and Hungary.
